Summary

Software Engineer with hands-on experience building scalable applications and contributing to client projects across **Salesforce and backend technologies**. Experienced in **Apex, REST APIs, Node.js, Express.js, MongoDB, LWC, SOQL, and Salesforce automation**, working across **60+ Apex classes** and achieving **85%+ test coverage**, with strong problem-solving skills.

Skills

Salesforce: Apex, SOQL, Sales Cloud, LWC, Batch Apex, Scheduled Apex, Screen Flows, Custom Metadata Types (CMDT), Custom Labels, Custom Objects, Lightning Record Pages, Apex APIs

Programming: Java, C++, Python, JavaScript, SQL, Bash/Shell

Backend & AI: Node.js, Express.js, MongoDB, REST APIs, Authentication, Socket.io, LLMs, LangChain, RAG

Tools: Salesforce CLI, Git, GitHub, Bitbucket, Postman, VS Code, Linux (Ubuntu)

Experience

CloudKaptan Consultancy Services

Mar 2026 – Sept 2026

SWE Intern

Kolkata / On-site

- Developed and enhanced **Salesforce Apex APIs, services, Batch Apex, and Scheduled Apex** supporting Partner Portal, origination, servicing, and notification workflows.
- Delivered changes for the **flexible loan disbursement and TPO requirement** across **60+ Apex classes**, modifying interconnected application logic while preserving existing business behavior and minimizing regression risk.
- Developed **user deactivation/reactivation APIs** with role-based and business-rule validations covering user status, suspension dates, and training status, reducing manual admin overrides by approximately **30%** through standardized parameter validation and exception handling.
- Built a scheduled **Project Cancellation Notification** solution using Apex Scheduler, Custom Metadata, Application Status History, and Salesforce Email Templates, delivering configurable weekly consolidated notifications to **30+ stakeholders**.
- Enhanced **Partner Portal** functionality for PI Executive and Admin user management with role-based permissions and validation rules to update user information and roles.
- Refactored Apex code to reduce **PMD cyclomatic complexity** and built comprehensive **Apex test classes** covering positive, negative, exception, and automation scenarios, achieving **85%+ code coverage**; also troubleshooted SOQL queries, read-only history objects, email templates, and Salesforce data relationships.
- Worked across the Salesforce stack, including **Sales Cloud, LWC, Screen Flows, Custom Metadata, Custom Labels, Custom Objects, Lightning Record Pages, Git, and Bitbucket**, while also contributing to **RAG pipeline development**.

Education

Meghnad Saha Institute of Technology

Kolkata, West Bengal

B.Tech in Information Technology (CGPA: 8.29)

2022 – 2026

Eastern Railway Higher Secondary School

Asansol

WBCHSE (12th): 83.8%

2019 – 2021

Projects

Equinox – AI-Powered Conversational Platform | |

2025

Tech Stack: Node.js, Express.js, Supabase, Google Gemini API, Tailwind CSS

- Built an AI-powered conversational platform integrating the **Google Gemini API** for intelligent responses and interactive chat workflows.
- Implemented secure authentication and session handling using **Supabase Auth**, onboarded **50+ users**, and deployed the platform on Render with GitHub-based CI/CD.

Cloud Drive Backend Project |

2025

Tech Stack: Node.js, Express.js, MongoDB, Supabase Storage, Multer, EJS

- Developed a backend-driven cloud storage system with secure file upload/download workflows and protected routes.
- Integrated **Supabase Storage** for file management and **MongoDB** for metadata persistence and access control.

Achievements

- **Solved 400+ Problems:** Built strong DSA fundamentals through consistent practice across competitive coding platforms.
- **Ranked in Top 8%:** Achieved a rank under 200 among **2,500+ active college coders**.
- **Smart India Hackathon 2024:** Built a real-world solution as part of a team under tight deadlines.
